# We C.A.R.E. Scratch Story Creation Competition

STEM education is one of the hot topics in education in recent years. Many children start to learn coding at a young age. In collaboration with the ICT Department, the English Department organized a new internal competition, We C.A.R.E Scratch Story Creation Competition, to boost students' coding skills, enhance their language proficiency and nurture positive values in them. The theme is empathy, honesty, responsibility or national identity. Our young programmers used Scratch to create interesting stories related to the theme. The winners are listed as follows:

P.5-6
1st: 5A Fu Man Kit, Tommy
2nd: 6A Kwan Ching Tung, Charissa
3rd: 6A Chan Foon Hang, Harrison
Merit: 5A Mak Bo Yuan, Canning

P.3-4
1st: 4A Lee Yat Him, Hymns
2nd: 4B Wu Chun Wa, Andy
3rd: 4A Lui Cheuk Lam, Billy
Merit: 3A Kwan Yik Wan, Ivana

Tommy's story about empathy

Charissa's story about honesty

Harrison's story of responsibility

Hymns's story of responsibility

Andy's story about empathy

It is a famous story of Chinese history.

Students can colour or decorate their music box.

Look at my funny walking robot.

Look at our whale cars. They can move!

What is empathy?

Everyone is focusing on the question.

English Weeks

In English Week 1 after the exam in March and English Week 2 in June, students learnt about the three target values of this year – empathy, responsibility and honesty by watching videos, listening to songs and bible stories in class. Students could also go to the English room to battle against their schoolmates in Kahoot challenges which test their understanding of what they have learnt in class.

In English Week 2, STEAM elements were added. Students made different STEAM crafts after watching the instructional videos made by the P.4 to P.6 CEOs. See how focused they were when putting all the small parts together!
