

Photo-editing Competition

24th November, 2020 – 4th January, 2021

Cross-curricular learning involves establishing patterns of information between different academic subjects. It offers a creative way of developing knowledge, understanding and practical skills through a study of interconnected topics.

In order to enrich students' learning experiences, widen students' learning space and motivate students' interest in learning, we held a cross-curricular activity with ICT (Information and Communications Technology) which is 'Photo-editing Competition' this year. The topic is "Have a Blessed Christmas and Happy New Year". Through the activity, students could bless others by taking photos and adding words of blessing about Patience, Kindness or Goodness or a message of encouragement in light of COVID-19. Students had lots of fun and creativity in taking and designing their photos. A total of 43 entries were collected in the competition. The winners are shown as follows:
